A Focused Wine List

As the largest wine growing area in the world, the Languedoc-Roussillon is able to provide a diversity of terroir (geology, geography and climate), allowing us to source a wide range of wines from this one area alone.

For us, one of the true benefits of having such a focused wine list is that it has allowed us to develop a strong connection to this region of France. Regular trips to the area have meant that not only do we have personal attachments to many of our wines, but it has also allowed us to become experts on this region. As such, we have been able to select wines which evince fine winemaking and represent excellent value.

If you would like to know more about our wines then please ask any member of the team. Many have been fortunate enough to visit the region and are always more than happy to share their experiences.
